# **SUBJECT: BOTANY**

# **Subject prerequisites:**

- 1. To study Botany, a student must have had the subject Biology/Biotechnology learnt at 10+2 level.
- 2. Keen interest in plants and plant-related research, Potential in mathematics, biology and chemistry
- 3. Skills and aptitude for scientific study and research
- 4. Creativity and good comprehension while working on scientific procedures and research
- 5. Computer aptitude.

## **COURSE INTRODUCTION**

The new curriculum of B.Sc. in Science (Botany) offer essential knowledge and technical skills to study plants in a holistic manner. Students would be trained in all areas of plant biology using unique combination of core ,elective and vocational papers with significant inter-disciplinary components.

Students would be exposed to cutting-edge technologies that are currently used in the study of plant life forms, their evolution and interactions with other organisms within the ecosystem. Students would also become aware of the social and environmental significance of plants and their relevance to the national economy.

B.Sc. Botany program covers academic activities within the classroom sessions along with practical concepts at laboratory sessions. Infield, outstation activities and projects are also required to be organized for real-life experience and learning.

Candidates who have curiosity in plants kingdom, ecosystem, love exploring exotic places and wish to work as researchers or professions like Botanist, Conservationist, Ecologist, etc. can choose B.Sc. Botany course.

# **Programme outcomes (POs):**

Transformed curriculum shall develop educated outcome-oriented candidature, fostered with discovery-learning, equipped with practice & skills to deal practical problems and versed with recent pedagogical trends in education including e-learning, flipped class and hybrid learning to develop into responsible citizen for nation-building and transforming the country towards the future with their knowledge gained in the field of plant science.

riedge gamed in the field of plant science.						
CBCS syllabus with a combination of general and specialized education shall introduce the						
concepts of breadth and depth in learning						
Shall produce competent plant biologists who can employ and implement their gained						
knowledge in basic and applied aspects that will profoundly influence the prevailing						
paradigm of agriculture, industry, healthcare and environment to provide sustainable						
development.						
1						
Will increase the ability of critical thinking, development of scientific attitude, handling of						
problems and generating solution, improve practical skills, enhance communication skill,						
social interaction, increase awareness in judicious use of plant resources by recognizing the						
ethical value systemsystem.						
The training provided to the students will make them competent enough for doing jobs in						
Govt. and private sectors of academia, research and industry along with graduate preparation						
for national as well as international competitive examinations, especially UGC-CSIR NET,						
UPSC Civil Services Examination, IFS, NSC, FCI, BSI, FRI etc.						
Certificate and diploma courses are framed to generate self- entrepreneurship and self-						
employability, if multiexit option is opted.						
Lifelong learning be achieved by drawing attention to the vast world of knowledge of plants						
and their domestication.						

# Programme specific outcomes (PSOs): B.Sc. I Year / Certificate course in Microbial Technology & Classical Botany

This Programme imparts knowledge on various fields of plant biology through teaching, interactions and practical classes. It shall maintain a balance between the traditional botany and modern science for shifting it towards the frontier areas of plant sciences with applied approach. This syllabus has been drafted to enable the learners to prepare them for self-entrepreneurship and employment in various fields including academics as well as competitive exams. Students would gain wide knowledge in following aspects:

- 1. Diversity of plants and microbes their habitat, morphology, architecture and reproduction.
- 2. Plant disease causing microbes, symptoms &control.
- 3. Economic value of plants and their use in Human Welfare.

# Programme specific outcomes (PSOs): B.Sc. II Year/ (Diploma in Plant Identification, Utilization & Ethnomedicine)

This course provides a broad understanding of identifying, growing and using plants. This course is primarily aimed to introduce people to the richness of plant diversity found in surrounding areas. Lecture sessions are designed to cover fundamental topics concerning classification of plants and their utilization required for understanding the flora and vegetation. Practical sessions are organized following theory for easy understanding of the various parts of the plants, structural organization of floral parts and diversity therein. Participants are taken to different locations covering a variety of habitats and forest types to acquaint them with the native flora. in the long run, will contribute towards building momentum for people's participation in environmental conservation without compromising on academic rigour and our rich wealth of knowledge inherited over generations.

- 1. The course will cover conventional topics in Field Botany like Evolutionary History & Diversity of Plants, Complete Morphology, Nomenclature of plants, Systems of Classification, Keys to Important Families of Flowering Plants, Field Data Collection & Herbarium Techniques.
- 2. The course is designed to become a commercial crop grower, florist, protected cultivator, green belt plant advisor to industries, pharmacologist & taxonomist.

# Programme specific outcomes (PSOs): B.Sc. III Year / Bachelor of Science

The learning outcomes of three years graduation course are aligned with program learning outcomes but these are specific to-specific courses offered in a program. The core courses shall be the backbone of this framework whereas discipline electives, generic electives and skill enhancement courses would add academic excellence in the subject together with multi-dimensional and multidisciplinary approach.

- 1. Understanding of plant classification systematics, evolution, ecology, developmental biology, physiology, biochemistry, plant interactions with microbes and insects, morphology, anatomy, reproduction, genetics and molecular biology of various life-forms.
- 2. This course is suitable to produce expertise in conservation biology like ex-situ conservation, response to habitat change, genotype characterization and reproductive biology.
- 3. Understanding of various analytical techniques of plant sciences, use of plants as industrial

resources or as human livelihood support system and is well versed with the use of transgenic technologies for basic and applied research in plants.

- 4. Understanding of various life forms of plants, morphology, anatomy, reproduction, genetics, microbiology, molecular biology, recombinant DNA technology, transgenic technology and use of bioinformatics tools and databases and the application of statistics to biological data.
- **5.** Entrepreneurship Skill Development, Understand the issues of environmental contexts and sustainable development, Inculcation of human values,
- 6. Strengthen mathematical and computational skills. Enable students to use ICT&AI effectively.
- 7. Develop good skills in laboratory such as observation and evaluation by the use of modern tools and technology.

and technol	logy.
PSO 1	Understanding the nature and basic concepts of all the plant groups, their metabolism, components at the molecular level, biochemistry, taxonomy and ecology. The course will make them aware of natural resources and environment and the importance of conserving it. Hands on training in various fields will develop practical skills, handling equipments and laboratory use along with collection and interpretation of biological materials and data. Knowledge gained through theoretical and lab-based experiments will generate technical personnel in various priority areas such as genetics, cell and molecular biology, plant systematics and biotechnology.
PSO 2	Botanists are able to contribute to all these fields and therefore, are mainly employed with educational institutions, government or public sectors or companies in industries, such as agriculture or forestry, oil, chemical, biotechnology, geological survey, environmental protection, drugs, genetic research, plant resources laboratories, plant health inspection services, lumber and paper, food, fermentation, nursery, fruit and so on. Jobs available as a botanist: •Microbiologist, plant pathologist, Taxonomist • Plant Physiologist • Plant Biochemist • Researcher • Mycologist • Ecologist • Weed Scientist • Palaeobotanist • Conservationist • Fruit Grower • Morphologist • Cytologist • Ethnobotanist • Plant geneticists etc.
PSO 3	Inculcate strong fundamentals on modern and classical aspects of Botany, Understand knowledge of Botany is an essential pre-requisite for the pursuit of many applied sciences. It will facilitate students for taking up and shaping a successful career in Botany and allied sciences.
PSO 4	Introduction of research project will inculcate research aptitude and passion for higher education and scientific research.

# CERTIFICATE COURSE IN MICROBIAL TECHNOLOGY & CLASSICAL BOTANY / B.Sc.-I

Programme:	Certificate	Course	In Microbial	Technology &	& Classical	Year: I	Semester: I/Paper-II
Botany							

Subject: Botany

Course Code: B040102P Course Title: Techniques in Microbiology & Plant Pathology

**Course outcomes:** After the completion of the course the students will be able:

- 1. Understand the instruments, techniques ,lab etiquettes and good lab practices for working in a microbiology laboratory.
- 2. Develop skills for identifying microbes and using them for Industrial, Agriculture and Environment purposes.
- 3. Practical skills in the field and laboratory experiments in Microbiology & Pathology.
- 4. learn to identify Algae, Lichens and plant pathogens along with their Symbiotic and Parasitic associations.
- 5. Can initiate his own Plant & Seed Diagnostic Clinic
- 6. Can start own enterprise on microbial products

	Saccharomyces, Penicillium, Peziza , Ustilago, Puccinia; Fusarium, Curvularia,	
	Alternaria.	
	3. Agaricus: Specimens of button stage and full grown mushroom; Sectioning of gills	
	of Agaricus.	
	4. Lichens: crustose, foliose and fruticose specimens.	
13.7	PHYCOLOGY:	
IV	1. Type study of algae and Cyanobacteria – Spirullina, Nostoc.	
	Chlorophyceae - Chlorella, Volvox, Oedogonium, Cladophora, and Chara;	7
	Xanthophyceae – Vaucheria; Bacillariophyceae – Pinnularia Phaeophyceae – Sargassum	
	Rhodophyceae - Polysiphonia	
V	EXPERIMENTAL PLANT PATHOLOGY	
•	1. Preparation of fungal media (PDA) & Sterilization process.	8
	2. Isolation of pathogen from diseased leaf.	
	Identification: Pathological specimens of Brown spot of rice, Bacterial blight of rice, Loose	
	smut of wheat, Stem rot of mustard, Late blight of potato; Slides of uredial, telial, pycnial	
	& aecial stages of Puccinia ,Few viral and bacterial plant diseases.	
VI	PRACTICALS IN APPLIED MICROBIOLOGY-1	0
	<ol> <li>Isolation of nitrogen fixing bacteria from root nodules of legumes.</li> <li>Enumeration of rhizosphere to non rhizosphere population of bacteria.</li> </ol>	8
	<ol> <li>Enumeration of rhizosphere to non rhizosphere population of bacteria.</li> <li>Isolation of antagonistic Pseudomonas from soil.</li> </ol>	
	<ol> <li>Isolation of antagonistic 1 setudonionas from son.</li> <li>Microscopic observations of root colonization by VAM fungi.</li> </ol>	
	5. Isolation of Azospirillum sp. from the roots of grasses.	
	6. Isolation of phyllosphere microflora.	
	7. Isolation of P solubilizing microorganisms.	
	PRACTICALS IN APPLIED MICROBIOLOGY-2	
VII	1. Wine production.	8
	2. Isolation of lactic acid bacteria from curd.	<b>o</b>
	3. Isolation of lipolytic organisms from butter or cheese.	
	4. Immobilized bacterial cells for production of hydrolytic enzymes.	
	5. Enzyme production and assay – cellulase, protease and amylase.	
	6. Immobilization of yeast.	
	7. Isolation of cellulolytic and anaerobic sulphate reducing bacteria.	
	8. Isolation and characterization of acidophilic, alkalophilic and halophilic bacteria.	
	Cultivation of Spirulina, & Chlorella in lab for biofuel	
VIII	2. Visit to NBAIM,Mau,Varanasi(Kashi)/IMT,Chandigarh for viewing Culture	6
	Repository	
	3. Visit to biofertilizers and biopesticides unit to understand about the Unit operation	
L	-	

procedures

Mushroom cultivation for Protein

Alcohol production, from Sugarcane Juice.

This course can be opted as an elective by the students of following subjects: Open to all but special for B.Sc. Biotech, B.Sc. Microbiology, B.Sc. Agriculture, B.A. (Curators), B.A. Archaeology, B.A. Geology, BAMS.

# **Suggested Continuous Evaluation Methods:**

Continuous Internal Evaluation shall be based on allotted Assignment and Class Tests. The marks shall be as follows:

Internal Assessment	Marks
Class Interaction	5
Quiz	5
Seminar	7
Minor field work/excursion/lab visit/technology dessimination etc.	8

## **Course prerequisites:**

**Qualification:** To study this course, a student must have qualified 10+2 with Biology/ NSQF level 3 from Sector Skill Councils / Diploma holder from ITI in (Biology/ Agriculture/ Biotech/ Microbiology/biomedical Science.

BOTANY-UG-2020 Page 14

Facilities: Smart and Interactive Class

Other Requisites: Video collection, Books, CDs, Access to On-line resources, Display Charts
Lab Requisites: Microscopes, Stains, Dissection box, Haemocytometer, Specimens, Permanent slides, Autoclave, incubator, Oven, laminar flow cabinet, balances, Fermenter, Anaerobic jar and Spectrophotometer.

Programme /Class: B.ScI/ Certificate Course	In	Year: I	Semester: II
Microbial Technology & Classical Botany			Paper-I
Subject: <b>Botany</b>			
Course Code: B040201T	Cou	rse Title: Archegoniates and Pla	ant Architecture

## **Course outcomes:**

After the completion of the course the students will be able to:

- 1. Develop critical understanding on morphology, anatomy and reproduction of Bryophytes, Pteridophytes and Gymnosperms
  - 2. Understanding of plant evolution and their transition to land habitat.
- 3. Understand morphology, anatomy, reproduction and developmental changes therein through typological study and create a knowledge base in understanding the basis of plant diversity, economic values & taxonomy of plants

4. Understand the details of external and internal structures of flowering plants.

Credits: 4	Core Compulsory
Max. Marks: 25+75	Min. Passing Marks:

Total No. of Lectures-Tutorials-Practical (in hours per week): 4-0-0

Unit	Topic	Lectures (60hrs)
I	Introduction to Archegoniates & Bryophytes	
	Unique features of archegoniates, Bryophytes: General characteristics, adaptations to land	
	habit, Range of thallus organization. Classification (up to family), morphology, anatomy and	7
	reproduction of Riccia, Marchantia, Anthoceros and Sphagnum. (Developmental details not to	
	be included). economic importance of bryophytes.	
II	Pteridophytes	
	General characteristics, Early land plants ( <i>Rhynia</i> ). Classification (up to family) with	
	examples, Heterospory and seed habit, stelar evolution, economic importance of Pteridophytes.	8
III	Gymnosperms	
	Classification and distribution of gymnosperms; Salient features of Cycadales, Ginkgoales,	8
	Coniferales and Gnetales, their examples, structure and reproduction; economic importance	
	Palaeobotany	8
IV	General account of Cycadofilicales, Bennettitales and Cordaitales; Geological time scale;	
	Brief account of process of fossilization & types of fossils and study techniques; Contribution	
	of Birbal Sahni	

V	Angiosperm Morphology (Stem, Roots, Leaves & Flowers, Inflorescence)  Morphology and modifications of roots; Stem, leaf and bud. Types of inflorescences; flowers, flower parts, fruits and types of placentation; Definition and types of seeds.	7
VI	<b>Plant Anatomy:</b> Meristematic and permanent tissues, Organs (root, stem and leaf). Apical meristems & theories on apical organization - Apical cell theory, Histogen theory, Tunica - Corpus theory. Secondary growth - Root and stem- cambium (structure and function) annular rings, Anomalous secondary growth - <i>Bignonia, Boerhaavia, Dracaena,Nyctanthus</i>	7
VII	Reproductive Botany Plant Embryology, Structure of microsporangium, microsporogenesis, , Structure of megasporangium and its types, megasporogenesis, Structure and types of female gametophyte, types of pollination, Methods of pollination, Germination of pollen grain, structure of male gametophyte, Fertilization, structure of dicot and monocot embryo, Endosperm, Double fertilization, Apomixis and polyembryony.	8
VIII	<b>Palynology:</b> Pollen structure, pollen morphology, pollen allergy, Applied Palynology: Basic concepts, Palaeopalynology, Aeropalynology, Forensic palynology, Role in taxonomic evidences.	7

Year: I	Semester: II
	Paper-II (Practical)
Course Title: Land P	lants Architecture

#### **Course outcomes:**

- 1. The students will be made aware of the group of plants that have given rise to land habit and the flowering plants. Through field study they will be able to see these plants grow in nature and become familiar with the biodiversity.
- 2. Students would learn to create their small digital reports where they can capture the zoomed in and zoomed out pictures as well as videos in case they are able to find some rare structure or phenomenon related to these plants.
- 3. Develop an understanding by observation and table study of representative members of phylogenetically important groups to learn the process of evolution in a broad sense.
- 4. Understand morphology, anatomy, reproduction and developmental changes therein through typological study and create a knowledge base in understanding plant diversity, economic values & taxonomy of lower group of plants
- 5. Understand the composition, modifications, internal structure &architecture of flowering plants for becoming a Botanist.

Bournst.	
Credits: 2	Core Compulsory
Max. Marks: <b>25</b> +7 <b>5</b>	Min. Passing Marks:

# Total No. of Lectures-Tutorials-Practical (in hours per week): 0-0-2

Unit	Торіс	No. of Lectures
I	Bryophytes:  Marchantia- morphology of thallus, W.M. rhizoids and scales, V.S. thallus through Gemma cup, W.M. gemmae (all temporary slides), V.S. antheridiophore, archegoniophore, L.S. sporophyte (all permanent slides). Sphagnum- morphology, W.M. leaf, rhizoids, operculum, peristome, annulus, spores (temporary slides); permanent slides showing antheridial and archegonial heads, L.S. capsule and protonema.	8
П	Pteridophytes:  Lycopodium: Habit, stem T. S., stobilus V. S., Selaginella: Habit, rhizophore T. S, stem T. S, axis with strobilus, V. S. of strobilus, Megasporophyll and microsporophyll.  Equisetum - Habit, rhizome and stem T. S. and V. S. of strobilus.  Azolla - Habitat & its structure	7

III	Gymnosperms	
	1. Cycas – seedling, coralloid root and coralloid root T. S., T. S. of leaflet and	8
	Rachis, micro and mega sporophyll, male cone V. S., micro sporophyll T. S., entire	
	and V. S. of ovulePinus - Branch of indefinite growth, spur shoot, T. S of old stem	
	and needle R . L .S and T. L. S. of stem, male and female cone, V .S. of male and	
	female cone	
	Ephedra & Thuja -: Habit, stem T. S (young and mature), leaf T. S, male and	
	female strobilus, V. S. of male and female cone, ovule V. S. and seed.	
IV	Palaeobotany & Palynology	
1,	1. Morphology of Rhynia and fossils gymnosperms & other groups	6
	2. Visit to Birbal Sahni Institute of Palaeobotany or virtual conference with their	v
	scientists to learn fossilization	
	3. Mark and know about Indian geographical sites rich in plant fossils	
<b>T</b> 7		
V	Angiosperm Morphology	
	1. To study of diversity in leaf shape, size and other foliar features.	
	2. To study monopodial and sympodial branching.	8
	3. Morphology of Fruits	
	4. Inflorescence types- study from fresh/ preserved specimens	
	5. Flowers- study of different types from fresh/ preserved specimens	
	6. Fruits- study from different types from fresh/preserved specimens	
	7. Study of ovules (permanent slides/ specimens/photographs)- types (anatropous,	
	orthotropous, amphitropous and campylotropous)	
	8. Modifications in Roots, stems, leaves and inflorescences	
	Plant Anatomy:	
VI	Normal & Anomalous secondary thickening - Bignonia, Dracaena, Boerhavia	8
	diffusa,Nyctanthus	
	Study of primary and secondary growth in root and stem of monocots and dicots by	
	section cutting and permanent slides.	
	Study of internal structure of dicot and monocot leaves.	
	Study of structure of stomata.	
	Reproductive Botany	
VII	Structure of anther, microsporogenesis and pollen grains	
, 11	2. Structure of ovule and embryo sac development (through slides).	8
	3. Study of embryo development in monocots and dicots.	Ü
	4. Vegetative propagation by means of cutting, budding and grafting exercises.	
	5. Study of seed germination.	
	6. Study of pollen morphology of the following plants – <i>Hibiscus, Vinca, Balsam, Ixora,</i>	
	Crotalaria, Bougainvillea by microscopic observation.	
	7. Calculation of pollen viability percentage using in vitro pollen germination techniques.	
	Commercial Uses and Production technology	7
VIII	•	1
VIII	1. Azolla production	
	2. Production technology of Resins	
	3. Production and propagation of Ornamental Pteris, Cycadales, Coniferales for	
	landscaping.	
	4. Lab method for qualitative testing/ extraction of Ephedrine ,Taxol and Thuja oil.	
Suggested	Readings.

# Diploma in Plant Identification, Utilization & Ethnomedicine

Diploma in Plant Identification, Utilization & Ethnomedicine			
Programme /Class: <i>Diploma in Plant Identification, Utilization &amp; Ethnomedicine</i> Year: II Semester: III Paper-I			
Subject: Botany			
Course Code: B040301T	Course Title: Flowering Plants Identification & Aesthetic Characteristics		

#### **Course outcomes:**

After the completion of the course the students will be able to:

- 1. To gain an understanding of the history and concepts underlying various approaches to plant taxonomy and classification.
- 2. To learn the major patterns of diversity among plants, and the characters and types of data used to classify plants.
- 3. To compare the different approaches to classification with regard to the analysis of data.
- 4. To become familiar with major taxa and their identifying characteristics, and to develop in depth knowledge of the current taxonomy of a major plant family.
- 5. To discover and use diverse taxonomic resources, reference materials, herbarium collections, publications.
- 6. For the entrepreneur career in plants, one can establish a nursery, Start a landscaping business, Set up a farm Or Run a plantation consultancy firm

Credits: 4	Core Compulsory
Max. Marks: 25+75	Min. Passing Marks:

Total No. of Lectures-Tutorials-Practical (in hours per week): 4-0-0

Unit	Торіс	No. of Lecture (60hrs)
I	Taxonomic Resources & Nomenclature Components of taxonomy (identification, nomenclature, classification); Taxonomic resources: Herbarium- functions& important herbaria, Botanical gardens, Flora, Keys- single access and multi-access. Botanical Nomenclature- Principles and rules of ICN (ranks and names; principle of priority, binomial system; type method, author citation, valid-publication).	7
П	Types of classification & Evidences Artificial, natural and phylogenetic. Bentham and Hooker (upto series), Engler and Prantl (upto series) angiosperm phylogeny group (APG III) classification. Taxonomic evidences from palynology, cytology, phytochemistry & Molecular biology data (Protein and Nucleic acid homology).	8
Ш	Identification of Angiospermic families -I: (Families can be chosen University wise as per local available flora)  A study of the following families with emphasis on the morphological peculiarities and economic importance of its members (based on Bentham & Hooker's system) Ranunculaceae, Malvaceae, Rutaceae, Fabaceae, Myrtaceae, Cucurbitaceae, Rubiaceae Asteraceae, Apocynaceae, Acanthaceae, Asclepiadiaceae, Solanaceae	8
IV	Identification of Angiospermic families -II: (Families can be chosen University wise as per local available flora)  A study of the following families with emphasis on the morphological peculiarities and economic importance of its members (based on Bentham & Hooker's system)-Amaranthaceae, Euphorbiaceae, Papaveraceae, Scrophulariaceae, Orchidaceae, Liliaceae Arecaceae, Poaceae	7
V	Modern trends in Plant taxonomy:  Phenetics and Cladistics: Brief idea on Phenetics, Numerical taxonomy- methods, Operational Taxonomic Units, Cladistics- construction of dendrogram and primary analysis; Monophyletic, polyphyletic and paraphyletic groups; Plesiomorphy and apomorphy.	8
VI	TOOLS & SOFTWARES IN PLANT IDENTIFICATION- GIS ( Mapping of (i) Patterns(ii) Features (iii) Quantities 0P02.010H11YLIP - Free Phylogenetic Software, Digital Taxonomy, DEscription Language for TAxonomy – DELTA Internet directory for botany	7

	Computer Applications	7
VII	Introduction to Computers – classification, computer generation, low, medium and high	
	level languages, software and hardware, operating systems, compilers and interpreters, personal, mini, main frame and super computers, characteristics and application, computer memory and its types, data representation and storage.	
	Microsoft excel, data entry, graphs, aggregate functions, formulas and functions,	
	number systems, conversion devices, secondary storage media.	
	Aesthetic Characteristics of Plants:	8
VIII	Aesthetic characteristics of plants, English, Italian, French, Persian, Mughal and Japanese gardens; Features of a garden (Garden wall, Fencing, Steps, Hedge, Edging, Lawn, Trees, shrubs and shrubberies, climbers and creepers, rockery, Flower beds, Shrubbery, Borders, Water garden). Some Famous gardens of India. Conservatory, green houses, Indoor garden, Roof garden, Topiary, Bonsai

Programme/Class: : Diploma in Plant

Identification, Utilization & Ethnomedicine

inclusion, emignion & Limbonemen	r aper 11 (1 ractical
	Subject: <b>Botany</b>
Course Code: B040302P	Course Title: Plant Identification technology
Course outcomes:	
After the completion of the course the	students will be able:
1. To learn how plant specimens are c	ollected, documented, and curated for a permanent record.
<ol><li>To observe, record, and employ pla terminology.</li></ol>	nt morphological variation and the accompanying descriptive
2,	s tools and means available to identify plants.
4. To develop observational skills and	· ·
5. To identify a taxonomically diverse	*
6. To recognize common and major p	ant families.
	of flowering plants by making-landscapes,gardens,bonsai,miniatur
8. Comprehend the concepts of plant t	axonomy and classification of Angiosperms.
Credits: 2	Core Compulsory
Max. Marks: 25+75	Min. Passing Marks:
Total No. of Lec	ures-Tutorials-Practical (in hours per week): <b>0-0-2</b>
Unit	Tonic* No. of

BOTANY-UG-2020 Page 23

\*(Perform Any three experiments from each unit as per facility)

		(60Hrs)
I	Herbarium: Plant collecting, Preservation and Documentation: Stepwise Practicing Herbarium techniques: a. FIELD EQUIPMENTS, Global Positioning System (GPS) instrument & Collection of any wild 25 plant specimens b.Learn to handle Herbarium making tools c. Pressing and Drying of collected plant specimens d. Special treatments for all varied groups of plants e. Mount on standard herbarium sheets f. Label the n using Standard method g. Organize them and give Index Register Number	7
II	Taxonomic Identification using plant structure  a. Classify 25 plants on the basis of Taxonomic description (Plant Morphology, Anatomy, Reproductive parts, Habit, adaptation anomalies) according to Benthum Hooker system of classification in the following families: Malvaceae, Fabaceae (Papilionaceae), Solanaceae, Scrophulariaceae, Acanthaceae, Labiatae (Lamiaceae), Rubiaceae.	8
III	Identification during excursions  a. Conducting Spot identification (Binomial, Family) of common wild plants from families included in the theoretical syllabus (list to be provided) and making FIELD NOTE BOOK and filling Sample of a page of field-book, used in Botanical Survey of India.  b. Describe/compare flowers in semi-technical language giving V.S. of flowers, T.S. of ovaries, floral diagrams and Floral Formulae. Identify and assign them to their respective families giving reasons.	8
IV	COLLECTION, PRESERVATION AND STORAGE OF ALGAE, FUNGI BRYOPHYTES, PTERIDOPHYTES (Two each)	7
V	Botanical Nomenclature & reporting Method:  a. Give nomenclature to collected plants as per ICN rules and prepare labels as per BSI  b. Author Citation, Effective Publication and Principle of Priority: To show a specimen paper on Basic structure of a taxonomic Research published on a new species in taxonomic journal	7
VI	COMPUTERS  1. Learning to use EXCEL Microsoft PowerPoint and Word., WORKING WITH FOLDER AND WINDOWS UTILITY., CREATE AND MANAGE FILES AND FOLDER TREE,  2. Practice browsing of different sites using search engine. practice and understand different E-Mail services – Outlook, Yahoo mail, rediffmail etc. Practice Creating E-Mail accounts, Sending, Receiving & Storing of mails.  3. Create and Participate in virtual conferencing in an interactive Zoom Meeting	7
VII	Computer Application in taxonomy  1. Use Taxonomic Softwares (Dichotomous Key)  2. Practicals on Phylogenetic analysis  3. Make line drawing of Plants for description  4. Using of plant identification apps on android phones	8
VIII	1. Create a Bonsai of any plant 2. Develop a miniature garden 3. Draw Layouts of various types of gardens 4. Plant Propagation methods practice	8

- 2. <a href="https://www.for.gov.bc.ca/hfd/pubs/docs/wp/wp18.pdf">https://www.for.gov.bc.ca/hfd/pubs/docs/wp/wp18.pdf</a>
- 3. <a href="https://www.researchgate.net/publication/267510854">https://www.researchgate.net/publication/267510854</a> The Flowering Plants Handbook

## **Any Other:**

**Botanical Excursions:** One teacher along with a batch not more than 7 students be taken for botanical excursion to places of Botanical interest, one in each term. If there are female students in a batch of 7 students, one additional lady teacher is permissible for excursion.

Each excursion will not be more than SEVEN days during college working days. T.A. and D.A. for teachers and non-teaching staff participating in excursions should be paid as per rules. Tour report duly certified by tour in charge teacher and Head of the Department should be submitted at the time of practical examination. For every study tour take the prior permission of the head of the department and Principal.

The marks will be counted under Internal assessment and external assessment both. In external assessment student will have to present his excursion report along with industrial training/central labs visits and BSI or Museum visits. In internal assessment he shall have to label the campus plants with botanical details/develop herbal/floristic garden/conserve plants in botanical garden/contribute specimens via collection .

A project supported along with photographs taken during field study to be submitted giving comprehensive idea about different types of inflorescence, flowers and fruits/

At least three field excursions at hills/Oceans/Deserts including one Compulsory excursion to Botanical Garden, FRI/BSI and Central National Herbarium (CNH). Central Research Institutes/Hot Spots

Programme /Class: <b>Diploma in Plant Identification, Utilization &amp; Ethnomedicine</b>	Year: II	Semester: IV Paper-I
Subject: Botany		
Course Code: B040401T	Course Title: Economic Botany, Ethnomedicine and Phytochemistry	

# **Course outcomes:**

After the completion of the course the students will be able to:

- 1. Understand about the uses of plants –will know one plant-one employment
- 2. Understand phytochemical analysis related to medicinally important plants and economic products produced by the plants
- 3. know about the importance of Medicinal plants and its useful parts, economically important plants in our daily life and also about the traditional medicines and herbs, and its relevance in modern times.

	Credits: 4	Core Compulson	ry
Max. Marks: 25+75 Min. Passing Mark		ks:	
Total No. of Lectures-Tutorials-Practical (in hours per week): 4-0-0			
Unit	Торіс		No. of Lectures (60hrs)
I Origin and domestication of cultivated plants Centers of diversity of plants, origin of crop plants. Domestication and introduction of crop plants. Concepts of sustainable development; cultivation, production and uses of Cereals, legumes, Spices & beverages.		7	

П	Botany of oils, Fibers, timber yielding plants & dyes Study of the plants with Botanical names, Family, part used, and economic uses yielding Edible & essential oils; Sugar, Starch; Fibers; Paper, Fumitories & Masticatories, Rubber, Dyes, Timber, biofuel crops	7
Ш	Commercial production of Flowers, Vegetables, and fruits (To be Chosen area wise)  Commercial greenhouse cultivation of rose, Gerbera, Gladiolus, Anthurium/lilium/lily, tomato, bell pepper, cucumber, strawberry & Exotic leafy vegetables using Hydroponics.	7
IV	IPR & Traditional Knowledge IPR and WTO (TRIPS, WIPO), Patent Act 1970 and its amendments, TIFAC, NRDC, Rights, Procedure of obtaining patents, Working of patents, Infringement, Copyrights, Trademarks, Geographical Indications, Traditional Knowledge Digital Library, Protection of Traditional Knowledge & Protection of Plant Varieties and Biotech inventions.	8
V	Ethnobotany Methodologies of ethnobotanical research: Field work, Literature, Herbaria and Musea and other aspects of ethnobotany. Importance of ethnobotany in Indian systems of medicine (Siddha, Ayurveda and Unani), Role of AYUSH, NMPB, CIMAP and CARI. Tribal knowledge towards disease diagnosis, treatment, medicinal plants, plant conservation and cultivation.	8
VI	Medicinal aspects Study of common plants used by tribes( Aegle marmelos, Ficus religiosa, Cynadon dactylon, Eclipta alba, Oxalis, Ocimum sanctum and Trichopus zeylanicus) Ethnobotanical aspect of conservation and management of plant resources, Preservation of primeval forests in the form of sacred groves of individual species and Botanical uses depicted in our epics. Plants in primary health care: common medicinal plants: Tinospora, Acorus, Ocimum, Turmeric and AloeIndian Pharmacopeia, Quality Evaluation of crude drugs & adulteration	8
VII	Pharmacognosy  Preparation of drugs for commercial market - Organoleptic evaluation of drugs - Microscopic evaluation of drugs - Physical evaluation of drugs - Active and inert constituents of drugs - Classification of drug plants - individual drugs - drug adulteration. Sources of crude drugs - roots, rhizome, bulb, corm, leaves, stems, flowers, fruits and seeds; organoleptic study of Adhatoda vasica, Andrographis paniculata, Azadirachta indica, Coriandrum sativum, Datura metal, Eclipta alba, Emblica officinalis, Ocimum sanctum, Phyllanthus amarus, Ricinus communis, Vinca rosea and Zingiber officinale.	8
VIII	Herbal Preparations & Phytochemistry:  Collection of wild herbs - Capsules - compresses - Elixirs - Glycerites - Hydrotherapy or Herbal bath - Herbal oils - Liquid extracts or Tincture - Poultices - Salves - Slippery elm slurry and gruel - Suppositories - Teas. Plant natural products , general detection, extraction and characterization procedures. Glycosides and Flavonoids and therapeutic applications. Anthocyanins and Coumarins and therapeutic applications, Lignans, Terpenes, Volatile oils and Saponins, Carotenoids and Alkaloids Carotenoids and pharmacological activities.	7

IV	Documentation from Traditional Knowledge Digital Library,	7
1 V	Mark the Geographic Indications on Map,	
	Understand –Nakshtra Vatika, Navgrah vatika and develop in your college	
	To extract the names of the plants and Botanical uses depicted in our epics.	
	Visit NISCAIR,New Delhi	
$\mathbf{V}$	Ethnobotany	
	Study of common plants used by tribes. Aegle marmelos, Ficus religiosa, Cynadon	
	dactylon.,	7
	Visit a tribal area and collect information on their traditional method of treatment using	
	crude drugs.	
	Familiarize with at least 5 folk medicines and study the cultivation, extraction and its	
	medicinal application.	
	Observe the plants of ethno botanical importance in your area.	
	Visit to an Ayurveda college or Ayurvedic Research Institute / Hospital	
VI	Instrumentation and herbal Preparations	_
	Develop Capsules of herbs/, Develop Herbal oils/, Develop Poultice/cream	8
	Analyse some active ingredients using chromatography /Spectrophotometry	
VII	Pharmacognosy	8
	Organoleptic studies of plants mentioned in the theory:	
	1. Morphological studies of vegetative and floral parts.	
	2. Microscopic preparations of root, stem and leaf.	
	3. Stomatal number and stomatal index.	
	4. Vein islet number.	
	<ul><li>4. Vein islet number.</li><li>5. Palisade ratio.</li></ul>	
	<ul><li>4. Vein islet number.</li><li>5. Palisade ratio.</li><li>6. Fibres and vessels (maceration).</li></ul>

This course can be opted as an elective by the students of following subjects: Open to all but special for B.Sc. Biotech, B.Sc. Forestry, B.Sc. Agriculture, B. Pharma, B.A. (Curators), B.A. Arch, BAMS

# **Suggested Continuous Evaluation Methods:**

Continuous Internal Evaluation shall be based on allotted Assignment and Class Tests. The marks shall be as follows:

Internal Assessment	Marks
Class Interaction	5
Quiz	5
Seminar	7
Assignment (Charts/ Flora/ Rural Service/ Technology Dissemination)	8
	25

# **Course prerequisites:**

**Qualification:** To study this course, a student must have qualified 10+2 with Biology/ NSQF level 3 from Sector Skill Councils / Diploma holder from ITI in (Biology/ Agriculture/ Forestry).

**Facilities: Smart and Interactive Class** 

**Other Requisites:** Video collection, Books, CDs, Flora, Herbarium, Access to On-line resources, Display Charts **Lab requisites:** Repository of economic products, Microscopes/ Botanical /Herbal Garden, TLC, Spectrophotometer.

BACHELOR OF SCIENCE (BOTANY)				
Programme/Class: <i>Bachelor of Science</i>	Year: III	Semester: V Paper-I		
Subject: BOTANY				
Course Code: B040501T	Course Title: Plant Physiology, Mer	tabolism & Biochemistry		

# Course outcomes:

After the completion of the course the students will be able to:

- 1. Understand the role of Physiological and metabolic processes for plant growth and development.
- 2. Learn the symptoms of Mineral Deficiency in crops and their management.
- 3. Assimilate Knowledge about Biochemical constitution of plant diversity.
- 4. Know the role of plants in development of natural products, nutraceuticals, dietary supplements, antioxidants

Credits: 4	Core Compulsory
Max. Marks: 25+75	Min. Passing Marks:

Total No. of Lectures-Tutorials-Practical (in hours per week) 4-0-0

Unit	Торіс	No. of Lectures(60hrs)
I	Plant water relation, Mineral Nutrition, Transpiration and translocation in phloem Importance of water, water potential and its components; Transpiration and its significance; Factors affecting transpiration; Root pressure and guttation. Criteria of essentiality of elements; Role of essential elements; Symptoms of mineral deficiency in major crops, Transport of ions across cell membrane, active and passive transport, Composition of phloem sap, girdling experiment; Pressure flow model.	7
II	Carbon Oxidation Krebs cycle, Glycolysis, fate of pyruvate- aerobic and anaerobic respiration and fermentation, regulation of glycolysis, oxidative pentose phosphate pathway, oxidative decarboxylation of pyruvate, regulation of Kerbs cycle, mitochondrial electron transport, oxidative phosphorylation, ATP-Synthetase, Chemiosmotic mechanism, P/O ratio, cyanide-resistant respiration, factors affecting respiration.	7
III	Nitrogen Metabolism Nitrate assimilation, biological nitrogen fixation (examples of legumes and non-legumes), Physiology and biochemistry of nitrogen fixation, Ammonia assimilation (GS-GOGAT), reductive amination and transamination, amino acid synthesis.	8
IV	Lipid Metabolism & Photosynthesis Lipid Metabolism: Synthesis and breakdown of triglycerides, -oxidation, glyoxylate cycle, gluconeogenesis and its role in mobilization of lipids during seed germination, -oxidation.; Photosynthesis: Pigments, Action spectra and Enhancement effect, Electron transport system and Photophosphorylation, C3 & C4 photosynthesis, CAM- Reaction and Significance	7
V	Plant Development, Movements, Dormancy & Responses  Developmental roles of Phytohormones (auxins, gibberellins, cytokinins, ABA, ethylene.) autonomic & paratonic movements, Control and Coordination in plants, Photoperiodism (SDP, LDP, Day neutral plants); Phytochrome (discovery and structure), red and far red-light responses on photomorphogenesis, Seed physiology & Dormancy, Vernalization & Senescence	8

VI	Biomolecules  Carbohydrates: Nomenclature and classification; Role of monosaccharides (glucose, fructose, sugar alcohols – mannitol and sorbitol); Disaccharides (sucrose, maltose, lactose), Oligosaccharides and polysaccharides (structural-cellulose, hemicelluloses, pectin, chitin, mucilage; storage – starch, inulin).  Lipids: Storage lipids: Fatty acids structure and functions, Structural lipids: Phosphoglycerides; Lipid functions: cell signals, cofactors, prostaglandins, Introduction of lipid micelles, monolayers, bilayers	8
VII	Proteins: Structure of amino acids; Peptide bonds; Levels of protein structure-primary, secondary, Ramchandran plot,tertiary and quarternary; Isoelectric point; Protein denaturation and biological roles of proteins  Nucleic acids: Structure of nitrogenous bases; Structure and function of nucleic acids, Nucleic acid denaturation & Re-naturation, MiRNA	7
VIII	Enzymes: Structure of enzyme: holoenzyme, apoenzyme, cofactors, coenzymes and prosthetic group; mechanism of action (activation energy, lock and key hypothesis, induced - fit theory), enzyme inhibition and factors affecting enzyme activity, Allosteric enzymes & Abzymes.  Phytonutrients, Nutraceuticals, dietary supplements and antioxidants.	8

Programme/Class: <i>Bachelor of Science</i>	Year: III	Semester: V Paper-II
	Subject: BOTANY	
Course Code: B040502T	Course Title: Molecular Biology &	Bioinformatics

# **Course outcomes:**

After the completion of the course the students will be able to:

- 1. Understand nucleic acids, organization of DNA in prokaryotes and Eukaryotes, DNA replication mechanism, genetic code and transcription process.
- 2. Know about Processing and modification of RNA and translation process, function and regulation of expression.

3. Gain working knowledge of the practical and theoretical concepts of bioinformatics

Credits: 4	CC / Elective
Max. Marks: <b>25+75</b>	Min. Passing Marks:

Total No. of Lectures-Tutorials-Practical (in hours per week) 4-0-0

Unit	Торіс	No. of Lectures(60hrs)
I	Genetic material  Miescher to Watson and Crick- historic perspective, Griffith's and Avery's transformation experiments, Hershey-Chase, bacteriophage experiment, DNA structure, types of DNA, types of genetic material. DNA replication (Prokaryotes and eukaryotes): semiconservative. DNA replication (Prokaryotes and eukaryotes): bidirectional replication, semi-conservative, semi discontinuous RNA priming, Ø (theta) mode of replication, replication of linear, dsDNA, replicating the 5 end of linear chromosome including replication enzymes.	7

II	<b>Transcription &amp; Regulation of gene expression</b> Types of structures of RNA (mRNA, tRNA, rRNA), RNA polymerase- various types; Translation, (Prokaryotes and eukaryotes), genetic code. Regulation of gene expression in Prokaryotes: Lac operon and Tryptophan operon; and in Eukaryotes	7
I I I	Principles & Techniques of genetic engineering Blotting techniques: Northern, Southern and Western Blotting, DNA Fingerprinting; Molecular DNA markers i.e. RAPD, RFLP, SNPs; DNA sequencing, PCR and Reverse Transcriptase-PCR. Hybridoma and monoclonal antibodies, ELISA and Immunodetection. Antibody Engineering.	8
IV	Applications of Genetic engineering Pest resistant (Bt-cotton); herbicide resistant plants (RoundUp Ready soybean); Transgenic crops with improved quality traits (Flavr Savr tomato, Golden rice); Improved horticultural varieties (Moondust carnations); Role of transgenics in bioremediation (Superbug); Industrial enzymes (Aspergillase, Protease, Lipase); Genetically Engineered Products, Biosafety concerns	7
V	Bioinformatics & its applications  Computer fundamentals - programming languages in bioinformatics, role of supercomputers in biology. Historical background. Scope of bioinformatics - Genomics, Transcriptomics, Proteomics, Metabolomics, Molecular Phylogeny, computer aided Drug Design (structure based and ligand based approaches), Systems Biology and Functional Biology. Applications and Limitations of bioinformatics.	8
VI	Biological databases: Introduction to biological databases - primary, secondary and composite databases, NCBI, nucleic acid databases (GenBank, EMBL, DDBJ, NDB), protein databases (PIR, Swiss-Prot, TrEMBL, PDB), metabolic pathway database (KEGG, EcoCyc, and MetaCyc), small molecule databases (PubChem, )	8
VII	Data Generation and Data Retrieval Generation of data (Gene sequencing, Protein sequencing, Mass spectrometry, Microarray), Sequence submission tools (BankIt, Sequin, Webin); Sequence file format (flat file, FASTA, GCG, EMBL, Clustal, Phylip, Swiss-Prot); Sequence annotation; Data retrieval systems (SRS, Entrez)	7
VIII	Phylogenetic analysis Similarity, identity and homology, Alignment – local and global alignment, pairwise and multiple sequence alignments, alignment algorithms. Methods of Alignment (Dot matrix, Dynamic Programming, BLAST and FASTA); Phylogenetic analysis: Construction of phylogenetic tree, dendrograms, methods of construction of phylogenetic trees.	8

Programme/Class: Bachelor of Science	Year: III	Semester: V Paper-III	
Subject: Botany			
Course Code: B040503P	Course Title: Experiments in physiology, Biochemistry & molecular biology		

# **Course outcomes:**

After the completion of the course the students will be able to:

- 1. Know and authentic the physiological processes undergoing in plants along with their metabolism
- 2. Identify Mineral deficiencies based on visual symptoms
- 3. Understand and develop skill for conducting molecular experiments for genetic engineering

Credits: 2	Core Compulsory
Max. Marks: 25+75	Min. Passing Marks:

Total No. of Lectures-Tutorials-Practical (in hours per week) 0-0-2

Unit	Topic* *(Perform any three from each unit based on facility)	No. of Lectures(60 hrs)
I	<ol> <li>Plant water relation, Mineral Nutrition and translocation in phloem</li> <li>Determination of osmotic potential of plant cell sap by plasmolytic method using leaves of Rhoeo / Tradescantia.</li> <li>Osmosis – by potato osmoscope experiment</li> <li>Effect of temperature on absorption of water by storage tissue and determination of Q10.</li> <li>Experiment to demonstrate the transpiration phenomenon with the bell jar method</li> <li>Experiment for demonstration of Transpiration by Four-Leaf Experiment:</li> <li>Structure of stomata (dicot &amp; monocot)</li> <li>Determination of rate of transpiration using cobalt chloride method.</li> <li>Experiment to measure the rate of transpiration by using Farmer's Potometer</li> <li>Experiment to measure the rate of transpiration by using Ganong's potometer</li> <li>Effect of Temperature on membrane permeability by colorimetric method.</li> </ol>	8
	11. Study of mineral deficiency symptoms using plant material/photographs.	
I	Nitrogen Metabolism, Photo Synthesis & Respiration  1. A basic idea of chromatography: Principle, paper chromatography and column chromatography; demonstration of column chromatography.	8
	<ol> <li>Separation of plastidial pigments by solvent and paper chromatography.</li> <li>Estimation of total chlorophyll content from different chronologically aged leaves (young, mature and senescence) by Arnon method.</li> <li>Effect of HCO<sub>3</sub> concentration on oxygen evolution during photosynthesis in an aquatic plant and to find out the optimum and toxic concentration (either by volume measurement or bubble counting).</li> <li>Measurement of oxygen uptake by respiring tissue (per g/hr.)</li> <li>Determination of the RQ of germinating seeds.</li> <li>Effect of light intensity on oxygen evolution in photosynthesis using Wilmott' bubble</li> </ol>	
Ш	Plant Development, Movements, Dormancy & Responses  1. Geotropism and phototropism — Klinostat  2. Hydrotropism -	8
	<ul> <li>a. Measurement of growth — Arc and Liver Auxonometer</li> <li>3. To study the phenomenon of seed germination (effect of light).</li> <li>4. To study the industrian of amylese activity in germinating grains</li> </ul>	
	<ul> <li>4. To study the induction of amylase activity in germinating grains.</li> <li>5. Test of seed viability by TTC method.</li> <li>6. To study the effect of different concentrations of IAA on <i>Avena</i> coleoptile elongation (IAA bioassay)</li> </ul>	
	Techniques for biochemical analysis	
V	<ol> <li>Weighing and Preparation of solutions -percentage, molar &amp; normal solutions, dilution from stock solution etc.</li> <li>Separation of amino acids by paper chromatography.</li> </ol>	8

	3. Detection of organic acids: citric, tartaric, oxalic and malic from laboratory	
	samples.,	
	4. Qualitative Analysis of carbohydrates,	
	5. Estimation of reducing sugar by anthrone method,	
	6. Qualitative Analysis of Lipids	
	7. ,Qualitative analysis of Amino acids and Proteins	
	8. ,Quantitative Analysis of Nucleic Acids,	
	9. Analysis of dietary supplements, nutraceuticals & antioxidants	
	10. Testing of adulterants in food items.	
V	Genetic material	7
·	1. Instruments and equipments used in molecular biology.	
	2. Preparation of LB medium and cultivating E.coli on it.	
	3. Isolation of Genomic DNA	
	4. Isolation of DNA from plants	
	•	
	5. Examination of the purity of DNA by agarose gel electrophoresis.	
	6. Quantification of DNA by UV-spectrophotometer	
	7. Estimation of DNA by diphenylamine method.	
VI	Preparation of models/ charts:	
	1. Study of experiments establishing nucleic acid as genetic material (Avery et al,	
	Griffith's, Hershey & Chase's and Fraenkel & Conrat's experiments)through	7
	photographs	
	2. Numericals based on DNA re-association kinetics (melting profiles and Cot	
	curves)	
	3. Study of DNA replication through photographs: Modes of replication - Rolling	
	circle, Theta and semi-discontinuous; Semiconservative model of replication	
	(Messelson and Stahl's experiment); Telomerase assisted end-replication of	
	linear DNA	
	4. Study of structures of : tRNA (2D and 3D); prokaryotic RNA polymerase and	
	eukaryotic RNA polymerase II through photographs	
	5. Study of the following through photographs: Assembly of Spliceosome	
	machinery; Splicing mechanism in group I & group II introns; Ribozymes and	
	Alternative splicing	
	6. Understanding the regulation of lactose (lac) operon (positive & negative	
	regulation) and tryptophan (trp) operon (Repression and De-repression &	
	Attenuation) through photographs.	
	7. Understanding the mechanism of RNAi by photographs	
VI	Genetic Engineering	
I	1. Isolation of protoplasts.	7
	2. Construction of restriction map of circular and linear DNA from the data	
	provided.	
	3. Isolation of plasmid DNA.	
	4. Restriction digestion and gel electrophoresis of plasmid DNA	
	(demonstration/ photograph).	
	5. Calculate the percentage similarity between different cultivars of a species	
	using RAPD profile. Construct a dendrogram and interpret results.	
	6. Agarose gel analysis of plasmid DNA	
	7. Restriction digestion of plasmid DNA -Demonstration of PCR	
	Applications of Genetic engineering	7
VII	1. ELISA Test, 2 Viability tests of cells	
1 1	3. Study of methods of gene transfer through photographs: Agrobacterium-	
[	mediated, direct gene transfer by electroporation, microinjection, microprojectile	
	bombardment.	
	4. Study of steps of genetic engineering for production of Bt cotton, Golden rice,	
	FlavrSavr tomato through photographs.

### This course can be opted as an elective by the students of following subjects:

Open to all but special for following: B.Sc. Math, B.Sc. Statistics, B.Sc. Nutrition, B.Sc. Biophysics, B.Sc. Biotech, B.Sc. Forestry, B.Sc. Agriculture.

**Suggested Continuous Evaluation Methods:** 

	aggested Continuous Evaluation Methods		
C	ontinuous Internal Evaluation shall be based on allotted Assignment and Class	Tests. The maMksrkhall be as follow	vs:
	Class Interaction	5	
	Quiz	5	
	Seminar	7	
	Assignment (Charts/ Flora/ Rural Service/ Technology Dissemination)	8	
		25	

### **Course prerequisites:**

**Qualification:** To study this course, a student must have qualified 10+2 with Biology/ NSQF level 3 from Sector Skill Councils / Diploma holder from ITI in (Biology/ Agriculture/ Forestry/ Biotech/ /Gardening)

**Facilities: Smart and Interactive Class** 

Other Requisites: Video collection, Books, CDs, Access to On-line resources, Display Charts

Lab requisites: Electrophoresis units, Gelrocker, UV-transilluminator, Vortex Mixer, Shaker, CVT,

HiMedia Biotechnology & Molecular biology Kits/Chemicals, Micropippettes, Elisa reader/Microtitre Reader

Programme/Class: Bachelor of Science	Year: III	Semester:V Paper-IV
	Subject: BOTANY	
Course Code: - B040504R	Course Title: Project in Botany for Pre-graduation	

### Course outcomes:

- Project work will supplement field experimental learning and deviations from classroom and laboratory transactions.
- project work will enhance the capability to apply gained knowledge and understanding for selecting, solving and decision-making processes.
- It will promote creativity and the spirit of enquiry in learners.
- They will learn to consult Scientists, libraries, laboratories and herbariums and learn importance of discussions, Botanical & field trips, print and electronic media, internet etc. along with data documentation, compilation, analysis & representation in form of dissertation writing.
- It will enhance their abilities, enthusiasm, and interest.

Credits: 03	Core: Compulsory
Max. Marks: 25+75	Min. Passing Marks:

Total No. of Lectures-Tutorials-Practical (in hours per week): 0-0-3.

### **Suggestive List Of PROJECTS**

- 1. Rural Areas: Flora of a city/village, Biodiversity of Village, Soil & seed testing service provision to farmers,
- 2. Industrial waste management
- 3. water pollution status of rural water & promotion of WASH in villages
- 4. Plant Disease identification in farms, nurseries and orchards.
- 5. Digital portal for plants: Campus, city or particular area
- 6. Rare and endangered plants & their conservation & domestication
- 7. Air pollution tolerance index (APTI): Screening of sensitive/tolerant plant species at various locations in particular area
- 8. Science Communication by Creating science documentaries of innovators, Internet Science (Social media, Websites, Blogs, Youtube, Podcast etc.)
- 9. Science Outreach Talks and Public Sensitization for plant biodiversity conservation sensitization of public.
- 10. Phytochemistry of medicinal plants & their antimicrobial, nutraceutical and antioxidant properties
- 11. Study of pollen grains in different flowers
- 12. Study of stomata in different plants
- 13. Study of various types of secretory and special tissues in plants.

Refer: libraries, journals, Memoirs, encyclopaedias, herbaria, Museums, etc.

This course can be opted as an elective by the students of following subjects:

Open to all

### **Suggested Continuous Evaluation Methods:**

Continuous Internal Evaluation shall be based on allotted Assignment and Class Tests. The marks shall be as follows:

Internal Assessment	Marks
Class Interaction	5
Seminar	10
Thesis/dissertation	10
	25

### Course prerequisites:

**Qualification:** To study this course, a student must have qualified 10+2 with Biology/ NSQF level 3 from Sector Skill Councils / Diploma holder from ITI in (Biology/ Agriculture/ Biotech/ Forestry/ Microbiology/Gardening /biomedical Science.

Facilities: Smart and Interactive Class

Other Requisites: All listed under all papers of the course.

Programme/Class: Bachelor of Science	Year: III	Semester: VI Paper-I
	Subject: Botany	
Course Code: B040601T	Course Title: Cytogenetics, Plant	Breeding & Nanotechnology

**Course outcomes:** After the completion of the course the students will be able:

- 1. Acquire knowledge on ultrastructure of cell.
- 2. Understand the structure and chemical composition of chromatin and concept of cell division.
- 3. Interpret the Mendel's principles, acquire knowledge on cytoplasmic inheritance and sex linked inheritance.
- 4. Understand the concept of 'one gene one enzyme hypothesis' along with molecular mechanism of mutation.
- 5. Interpret the concept of Lemarkism, Neo Lamarkism, Darwinism and also understand the concept of natural selection.

Credits: 4	Core Compulsory
Max. Marks: 25+75	Min. Passing Marks:

	Total No. of Lectures-Tutorials-Practical (in hours per week): 4-0-0		
Unit	Торіс	No. of Lectures (60hrs)	
I	Cell biology Structure and function of cell wall, plasma membrane, ribosomes, Endoplasmic reticulum, golgi apparatus, mitochondria, chloroplast, lysosomes, peroxisomes and cell inclusions - Organization of nucleus: nuclear envelope, nucleoplasm and nucleolus. Chromosomal nomenclature- chromatids, centromere, telomere, satellite, secondary constriction. Organization of chromosomes- Nucleic acid and histones- types and classification. Lampbrush chromosomes and polytene chromosomes- Karyotype and idiogram. Cell cycle: G0, G1, S and G2 phases – mitosis: open and closed mitosis – amitosis - meiosis. Variation in Chromosome number (Numerical aberrations)- anueploidy and Euploidy-haploidy, polyploidy- significance (Structural aberrations) - deletion, duplication, inversion and translocation.	8	
II	Genetics Chromosome theory of inheritance, crossing over and linkage; Incomplete dominance and codominance; Interaction of Genes; Multiple alleles, Lethal alleles, Epistasis, Pleiotropy, Polygenic inheritance; Extra-nuclear Inheritance, Linkage, crossing over, Concept of sex determination and Sex chromosomes; Patterns of Sex determination in plants	7	
III	Plant breeding Plant introduction. Agencies of plant introduction in India, Procedure of introduction - Acclimatization – Achievements, Selection - mass selection, pure line selection and clonal selection. Genetic basis of selection methods, Hybridization: Procedure of hybridization, inter generic, inter specific, inter varietal hybridization with examples. Composite and synthetic varieties, Male sterility, Heterosis and its exploitation in plant breeding, Mutation, Molecular Breeding (use of DNA markers in plant breeding), achievements in India, Breeding for pest, pathogenic diseases and stress resistance.	8	
IV	Biostatistics:  Definition, statistical methods, basic principles, variables- measurements, functions, limitations and uses of statistics. Biometry: Data, Sample, Population, random sampling, Frequency distribution- definition only, Central tendency- Arithmetic Mean, Mode and Median; Measurement of dispersion-Coefficient of variation, Standard Deviation, Standard error of Mean; Test of significance: chi- square test for goodness of fit. Computer application in biostatistics - MS Excel and SPSS	7	
V	Plant tissue culture Principles, components and techniques of in vitro plant cultures, Callus cultures, Cell culture, cell suspension cultures, Embryogenesis and organogenesis, Protoplast- isolation and culturing of protoplast- principle and application, regeneration of protoplasts, protoplast fusion and somatic hybridization- selection of hybrid cells, Somaclonal variation,, Plant secondary metabolites production.	8	

Page 43 BOTANY-UG-2020

	Nanotechnology	
VI	Fundamentals of nanoscale self-assembly process involved in important functional	7
	biomolecules such as Nucleic acid (DNA and RNA), Proteins, Enzymes. Cell structure and	
	organelles,nanoscale assembly of cellular components (cell membrane and liposomes).	
	Nanoscale assembly of microorganisms (virus). Nano-particles synthesis, Biological	
	synthesis of Nanoparticles, Advantages and applications of biologically synthesized	
	nanomaterials. Introduction to biological nanomaterials., Biomineralization, Magnetosomes,	
	nano-pesticides, nano-fertilizers, nano-sensors.	
	Artificial Intelligence in Plant Sciences	
VII	Big Data Analytics, Blockchain Technology, 3-D Printing, Machine learning,	8
	Algorithms of Machine Learning, Expert systems and Fuzzy logic, Artificial Neural	
	Networks and Genetic algorithms, Predictive Analytics, Agents and Robotics, IoT Sensors,	
	Object Image capture & analysis; Applications of Artificial Neural Networks in Plant	
	Science.	
	Introduction to use of Digital technologies – AI, IoT & ICT in Botany	
VIII	Educational software- INFLIBNET, NICNET, BRNET, internet as a knowledge repository-	7
	google scholar, science direct. resource management, weather forecasting. IoT Database	
	management, IoT platforms, IoT Graphical user interface • IoT application development for	
	Android Mobile phones, ICT Applications for different crops and horticulture

This course can be opted as an elective by the students of following subjects: Open to all but special for B.Sc. Biotech, B.Sc. Microbiology, B.Sc. Agriculture, B.A. (Curators), B.A. Archaeology, B.A. Geology

### **Suggested Continuous Evaluation Methods:**

Continuous Internal Evaluation shall be based on allotted Assignment and Class Tests. The marks shall be as follows:

Internal Assessment	Marks
Class Interaction	5
Quiz	5
Seminar	7
Assignment (Charts/ Flora/ Rural Service/ Technology Dissemination)	8
	25

### **Course prerequisites:**

**Qualification:** To study this course, a student must have qualified 10+2 with Biology/ NSQF level 3 from Sector Skill Councils / Diploma holder from ITI in (Biology/ Agriculture/ Biotech/ Forestry/ Microbiology/Gardening /biomedical Science.

### **Facilities: Smart and Interactive Class**

Other Requisites: Video collection, Books, CDs, Access to On-line resources, Display Charts

### **Suggested equivalent online courses:**

Programme/Class: Bachelor of Science	Year: III	Semester: VI Paper-III	
Subject: Botany			
Course Code: B040603P  Course Title: Lab on Cytogenetics, Conservation & Environment management		s, Conservation &	
Course outcomes: After the completion of the course the students will be able:  1. To perform all experiments related to the semester-i.e. Plant tissue cultured plants, conducting breeding on field, conserving and depolluting the environment.			

2. Can be employed in environment impact assessment companies & start his own venture			
Credits: 2 Core Compulsory			
Max. Marks: 25+75 Min. Passing Marks:			

Total No. of Lectures-Tutorials-Practical (in hours per week): 0-0-2

Lonic	No. of Lectures(60hrs)
1. Study of plant cell structure with the help of epidermal peal mount of Onion/Rhoeo/Crinum 2. Measurement of cell size by the technique of micrometry. 3. Counting cells per unit volume with the help of haemocytometer (Yeast/pollen grains) 4. Determination of mitotic index and frequency of different mitotic	7
	Cell biology  1. Study of plant cell structure with the help of epidermal peal mount of Onion/Rhoeo/Crinum  2. Measurement of cell size by the technique of micrometry.  3. Counting cells per unit volume with the help of haemocytometer (Yeast/pollen grains)

П	Genetics	
11		
		8
	2. Dihybrid cross (Dominance and incomplete dominance)	o
	3. Gene interactions (All types of gene interactions mentioned in the	
	syllabus)	
	a. Recessive epistasis 9: 3: 1.	
	b. Dominant epistasis 12: 3: I	
	c. Complementary genes 9: 7	
	d. Duplicate genes with cumulative effect 9: 6: 1	
	e. Inhibitory genes 13: 3	
	4. Observe the genetic variations among inter and intra specific plants.	
	5. Demonstration of Breeding techniques-Hybridization, case studies of	
	mutation, polyploidy, emasculation experiment	
III	Biostatistics:	
	1.Univariate analysis of statistical data: Statistical tables, mean, mode, median,	7
	standard deviation and standard error (using seedling population / leaflet size).	
	2. Calculation of correlation coefficient values and finding out the probability.	
	3.Determination of goodness of fit in Mendellian and modified mono-and dihybrid	
	ratios (3:1, 1:1, 9:3:3:1, 1:1:1:1, 9:7, 13:3, 15:1) by Chi-square analysis and	
	comment on the nature of inheritance.	
** 7	3. Computer application in biostatistics - MS Excel and SPSS	
IV	Plant tissue culture	0
	1. Familiarization of instruments and special equipments used in the plant tissue	8
	culture experiments 2. Preparation of plant tissue culture medium, and sterilization, Preparation of stock	
	solutions of nutrients for MS Media.	
	3. Surface sterilization of plant materials for inoculation (implantation in the	
	medium)	
	4. Micropropagation of potato/tomato/ - Demonstration	
	5.Protoplast isolation and culturing – Demonstration	
	Ecology & environment	
V		8
,	Epiphytes and Parasites	O
	2. (a). Study of morphological adaptations of hydrophytes and	
	xerophytes (four each).	
	3. (b). Study of biotic interactions of: Stem parasite (Cuscuta), Root	
	parasite (Orobanche) Epiphytes, Predation (Insectivorous plants).	
	4. Observation and study of different ecosystems mentioned in the	
	syllabus.  5. Field visit to femiliarize students with each are of different sites.	
X71	5. Field visit to familiarize students with ecology of different sites	0
VI	Soil Formation, Properties & Conservation	8
	1. Determination of pH of various soil and water samples (pH meter,	
	universal indicator/Lovibond comparator and pH paper)	
	2. Analysis for carbonates, chlorides, nitrates, sulphates, organic matter	
	and base deficiency from two soil samples by rapid field tests.	
	3. Determination of organic matter of different soil samples by	
	Walkley & Black rapid titration method.	
	4. Soil Profile study	
	5. Soil types of India-Map	
* 7**	Biodiversity and Phytogeography:	~
VII	1. Study of community structure by quadrat method and determination	7
	of (i) Minimal size of the quadrat, (ii) Frequency, density and	
	abundance of components (to be done during excursion/field visit).	
	2. Marking of vegetation types of India, World & Uttar Pradesh on	
	maps	
I	3. Phytogeographical areas of India	

VIII	Pollution &Waste management	7
	1. Study of instruments used to measure microclimatic variables: Soil	
	thermometer, maximum and minimum thermometer, anemometer,	
	psychrometer/hygrometer, rain gauge and lux meter	
	2. Estimation of chloride and dissolved oxygen content in water sample	
	3. Comparative anatomical studies of leaves form polluted and less polluted areas.	
	4. Measurement of dissolved O2 by azide modification of Winkler's method.	
	5. Determination of dissolved oxygen of water samples from polluted and unpolluted sources.	
	6. Microbiological assessment of drinking water using MPN technique- water	
	from well, river, water supply department and packaged drinking water	
	7. Making kitchen waste from compost/vermicompost by Enzymes/Bio	
	decomposer/ Whey with dung.	
	Climate Change, Carbon Credits &Role of GIS	
	1. Conducting Waste Audit of your Institution -Demo	
	2. Green auditing of the College/University -Demo	

### Suggested Readings: as in papers above:

### Course Books published in Hindi may be prescribed by the Universities.

- 1. Practical Botany (Part III) Author: Sunil D Purohit, Anamika Singhvi & Kiran Tak 2013 Apex Publishing House, Raj.
- 2. Practical Botany (Part II) Author: N. C. Aery, Sunil D Purohit & Gotam K Kukda 2013 Apex Publishing House, Raj.

Further Suggestions: Access to Statistics, Chemistry, Math and Biotechnology resources will be required

Programme/Class: Bachelor of Science	Year: III	Semester: VI /Project-	
Subject: BOTANY			
Course Code: - B040604R	Course Title: Project in B	Sotany for Graduation	

### **Course outcomes:**

After completing this course a student will have:

- Project work will supplement field experimental learning and deviations from classroom and laboratory transactions.
- project work will enhance the capability to apply gained knowledge and understanding for selecting, solving and decision-making processes
- It will promote creativity and the spirit of enquiry in learners.
- They will learn to consult Scientists, libraries, laboratories and herbariums and learn importance of discussions, Botanical & field trips, print and electronic media, internet etc. along with data documentation, compilation, analysis & representation in form of dissertation writing
- It will enhance their abilities, enthusiasm, and interest.

Credits: 03	Core: Compulsory
Max. Marks: 25+75	Min. Passing Marks:

# Max. Marks: 25+75 Min. Passing Marks: ...... Total No. of Lectures-Tutorials-Practical (in hours per week): 0-0-3. SUGGESTIVE LIST OF PROJECTS Prepare beds for growing nursery for herbs, shrubs and trees. Develop Green house facility in college and grow plants Develop hydroponics facility in college and grow plants. Develop botanical garden in the college with labelling Vertical gardens, roof gardens. Culture & art of making bonsai. Computer Aided Designing (CAD) for outdoor and indoor scaping Exposure to CAD (Computer Aided Designing) Phytochemical Analysis of Medicinal plants Bio composting and Vermicomposting. Performing Aromatherapy by essential Oils Refer: libraries, journals, Memoirs, encyclopaedias, herbaria, Museums, etc.

This course can be opted as an elective by the students of following subjects:

This course can be opted as an elective by the students of following subjects: Open to all

### **Suggested Continuous Evaluation Methods:**

Internal Assessment	Marks
Class Interaction	5
Seminar	10
Thesis/dissertation	10
	25
